### PROJECTS

#### French Restaurant | OverView:

[Live Site](#)

A full-stack web application with secure role-based authentication. Only verified users can access private routes, while admin users have special privileges to manage items (add, update, delete).

**Technologies:** React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Firebase,Stripe

#### Key Features:

- Implemented JWT authentication with middleware (verifyToken, verifyAdmin) for secure access control.
- Created private and admin routes to restrict unauthorized access.
- Built item management system where only admins can add, edit, or delete items.
- Integrated role-based dashboard for user and admin views.

#### PercelPailot | OverView:

[Live Site](#)

A secure parcel delivery website with Firebase authentication, JWT verification, and Stripe payment integration. Only logged-in users can access private routes and send parcels across Bangladesh.

**Technologies:** React, Tailwind CSS, Firebase, Node.js, Express.js, MongoDB, JWT, Stripe

#### Key Features:

- Firebase Auth & JWT-based secure login.
- PrivateRoute protection for users.
- Parcel sending & payment via Stripe.
- User dashboard with payment history.
- Rider application system.
- Admin can assign new admins and manage parcels.
- Integrated Bangladesh map for tracking.

#### E-commerce-site | OverView:

[Live Site](#)

Developed an e-commerce website fea detailed page. Integrated Firebase Authentication for secure login/signup. Designed a unique, responsive UI for better user experiencturing a variety of products with category-wise browsing. Implemented React Router for seamless navigation; each product has ae.

**Technologies:** React, Tailwind CSS, React Router, DaisyUI, Firebase, JavaScript.

#### Key Features:

- Firebase Authentication for secure user login and signup.
- Browse products by categories.
- Detailed product pages.
- Add and manage products in the shopping cart.
- Responsive design for both desktop and mobile.
- Unique custom UI/UX design.

**E-Learning Website | OverView:**[Live Site](#)

A fully responsive e-learning platform build with Next.js. The site features a clean, modern UI and uses category-based structured data, allowing users to browse and filter courses efficiently. Each course includes detailed information, and the overall user experience is optimized for both mobile and desktop devices.

**Technologies:** Next.js, Redux, Tailwind CSS, DaisyUI, Next-Auth.js, JavaScript, Other Packages

**Key Features:**

- Category-based browsing and filtering for all courses.
- Dedicated course detail pages with syllabus, description, and other info.
- User authentication for signup and login.

**Education****Shariatpur Polytechnic Institute****May, 2022 – Present ( 8<sup>th</sup> Semester)**

Diploma in Computer Science &amp; Technology
